BY JAYNE CHASE

The highest quality caviar from the world's most exclusive and sustainable farms.

Altima Caviar President **Maribel Alvarez** founded Altima International in 2000 as a Private Relations® and concierge firm, which works with an exclusive network of clients across the globe. The company's foundation stems from the founder's international background and education.

Over the years, Altima has nurtured working relationships with like-minded professionals throughout the world. Headquartered in **Palm Beach** with satellite affiliates worldwide, Altima is your global passport to luxury.

We have exhaustively vetted our providers to ensure our caviar is obtained only from farms that raise their sturgeon in clean, controlled, and secure environments. In many cases, they are overseen by internationally-acclaimed biologists to assure sustainable conditions, individual quality, and compliance to all international regulations.

Every fish is raised in conditions that closely match their natural habitat. This, as well as an abundance of clean, flowing, and oxygen-rich water, allows their farms to maintain the highest product quality without the use of growth hormones, GMOs, or preservatives.

Every tin of Altima Caviar is produced from one single fish which ensures our clients will experience perfect consistency every time, regardless of the size of their order.
